Skills

Language & Tools:

- Programming: Python, Java, HTML/CSS
- Database: MySQL, SQLite
- Software: MS Excel, Word, PowerPoint, VS Code

Other Skills:

- Data entry & spreadsheet management
- Report formatting & Presentation skills
- Good analytical & logical thinking

Languages

- Tamil (Native)
- English
- Sinhala (Read & Write)

PROFILE SUMMARY

Motivated and detail-oriented undergraduate pursuing a BEng (hons) in software engineering, with a strong foundation in java, python, and web technologies such as HTML and CSS. Passionate about building practical software solutions, demonstrated through academic projects including an airport management system. Aspiring to develop a career in data science, with a keen interest in data analysis, problem-solving, and continuous learning. A quick learner with strong analytical thinking and the ability to work both independently and collaboratively in team environments.

ACADEMIC QUALIFICATIONS

BEng (Hons) in Software Engineering

Informatics Institute of Technology (IIT), Sri Lanka

2026 - Currently in Second Year

- Studying core subjects including Programming, Databases, Networking, and Software Engineering
- Strong interest in data handling, system analysis, and software tools

Project

Airport Management System

- Developed a software application to manage airport operations including passenger handling and flight-related data
- Implemented core functionalities using **Java**, applying object-oriented programming concepts
- Designed user interactions for booking, managing, and viewing data efficiently
- Focused on clean code structure, validation, and logical problem solving.

Certifications

- Critical Thinking in the AI Era
- AI for Beginners
- Data Science & Analytics
- Data Analytics with Python
